

# WING AVENUE CORRIDOR STUDY

## PAVING THE WAY FOR THE FUTURE

Wing Avenue is in need of safety enhancements to efficiently and safely move goods and people within the City. Work to develop a roadway design to bring it up to the standards of other City streets is currently scheduled to be completed in 2017 with construction in 2018.

Kentwood has hired Fleis & VandenBrink (F&V) to assist with a corridor / traffic study and to gather public comments. The study will include a variety of concerns, including:

- Tree preservation
- Pedestrian and non-motorized accessibility
- Volume and speed of vehicles
- Safety of local residents and commuters
- Need for and options for utility infrastructure (storm sewer, sanitary sewer, public watermain)

### Tentative Schedule

We anticipate completing the study prior to the December 6 City Commission meeting. Our tentative schedule is:

Task	When
Field Work and Data Collection .....	August
Public Meeting .....	August 24
Review Preliminary Findings with City Staff .....	September
Meetings with Property Owners (As needed) .....	August - October
Public Meeting .....	October 17
Review & Incorporate Public Comments .....	Late October
Finalize Study and Present to City Commission .....	Early December
<i>Design engineering is anticipated in 2017 and construction in 2018.</i>	

F&V is an engineering and architecture firm helping communities enhance how they live, work and play.

Survey work will be completed during the month of August. City staff and Fleis & VandenBrink staff will be on site to collect information and will have identification (company vehicles, attire, etc.).

Public meetings have been scheduled for Wednesday, August 24, 2016 and Monday, October 17, 2016 at 7:00pm. The meetings will be held at City Hall, 4900 Breton Avenue SE, Kentwood, MI 49508.
